

Home Institution / Personal Physician Occupational Health Clearance for Visiting Researchers Working with Animals at UCLA & Non-UCLA Personnel Working on UCLA-Sponsored Field Studies

UCLA is committed to ensuring the welfare and safety of faculty, staff, and students conducting animal research, as well as the health and well-being of research animals. As part of this effort, researchers visiting UCLA, and those working on UCLA-sponsored field studies, must provide documentation that they have been cleared by their home institution or personal physician to work with the species used in the research activity.

Visiting Researcher:

Name and credentials:
Email address:
Home institution:
Is your home institution AAALAC accredited? <input type="checkbox"/> Yes <input type="checkbox"/> No
Date of visit / field work:

UCLA PI and protocol:

Protocol PI:	Protocol No:
Email address:	Species:
UCLA faculty member / supervisor:	

I have reviewed the attached vaccine/titer requirements and verify that the above-named individual is approved to work with the species identified above.

If non-human primate (NHP) is identified in the species field above, provide a date for each of the following:

QFT TB test with TB symptom screen: _____
 Flu vaccine record: _____
 MMR antibody titer record or 2-dose vaccine record: _____

 Signature of occ health administrator or personal physician Date

Name (please print): _____

Email address: _____

This form must be signed by an Occupational Health representative from the visiting researcher's home institution, or a personal physician, and submitted to the ARC office at least 2 weeks prior to the individual participating in a project.

VISITING RESEARCHERS:

VACCINE/ TITER REQUIREMENTS FOR WORKING WITH RESEARCH ANIMALS

	Non-Human Primates	Bats	Swine, Birds (including poultry)	Sheep, goats, cattle	Marine mammals (dolphins, otters)	Wild caught mammals	All other animals (rodents, rabbits, reptiles, fish)
QuantIFERON (QFT) TB test with TB symptom screen							
Flu vaccine (within past year)							
Measles, mumps, rubella (MMR) antibody titer record or 2-dose vaccine record							
Tetanus vaccine record (within past 10 years)							
Hepatitis B vaccine record or surface anti-body titer record							
2-dose Rabies vaccine record or Rabies Serologic testing record							
Q-fever titer (within past year)							

IN CASE OF EMERGENCY: please visit Ronald Reagan ER, an Urgent Care facility, or the OccHealth entity your home institution uses (e.g. CompHealth USA, Exeter, Kaiser).
